*When cleanliness is next to godliness*

## Shooter's Choice Universal Cleaning Kit - When cleanliness is next to godliness.

By: Sal Palma

The saying "cleanliness is next to godliness"<sup>1</sup> is not a direct quote from the Bible but it requires the same adherence when it comes to firearms and in 2025 Shooter's Choice, an OTIS Technology company, delivered the path to heaven, with the introduction of the Universal Gun Cleaning Kit.

Shooter's Choice, located in Lyons Falls, New York, is a household name when it comes to firearm maintenance. They have a notable history in the industry, primarily known for its gun cleaning and maintenance products.

Shooter's Choice was established approximately 40 years ago, around 1985, with an initial focus on creating effective

solvents, lubricants, and protectants for firearms.

Over the years, Shooter's Choice built a solid reputation for the quality and performance of its gun care products, earning loyal customers ranging from amateur and professional target shooters, hunters to armorers, law enforcement, and military in the US and internationally.

In 2018, Shooter's Choice was acquired by Otis Technology, another prominent gun cleaning systems and accessories manufacturer based in Lyons Falls, NY.

The acquisition broadened Otis Technology's product offerings and market reach within the gun care industry.

Shooter's Choice continues to operate as a distinct brand under the Otis Technology umbrella.

At Shot Show, in Las Vegas, Shooter's Choice introduced the Universal Cleaning Kit and subject of our review.

This all-inclusive cleaning kit tackles everything from .22 caliber up to 12 gauge. You'll find every essential tool for maintaining your pistols, rifles, and shotguns right here. Tired of losing small parts from

<sup>1</sup> John Wesley and Methodism: John Wesley, the founder of Methodism in the 18th century, is also strongly associated with the saying. He emphasized the importance of both spiritual and practical holiness, which included

cleanliness and orderliness. He is often credited with popularizing the exact phrasing "Cleanliness is indeed next to godliness."

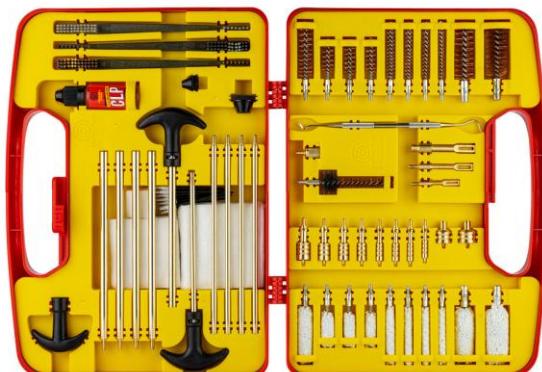

those other multi-caliber kits? Shooter's Choice has engineered the case with components that securely lock into place. For me, that alone justifies your purchase.

Competing multicaliber cleaning kits also fail to recognize the importance of cleaning rod size. In their Universal Kit, Shooter's Choice provides two sizes:

1. One 5mm brass rod with swivel T-handle for .22-.270 calibers.
2. One 7mm brass rod with swivel T-handle for .30 caliber and larger.

Included in the kit are two bore guides in 5mm and 7mm. Bore guides are essential to keep the cleaning rod from striking and potentially damaging barrel threads.

Everything that you need to keep your firearms in tip-top shape is included in the Shooter's Choice Universal Cleaning Kit

In conclusion, the Shooter's Choice Universal Cleaning Kit stands out as an indispensable tool for any firearm owner. Its comprehensive selection of high-quality components ensures that you have everything necessary to thoroughly clean and maintain your rifles, pistols, and shotguns. Regular cleaning with this kit not only preserves the longevity and reliability of your firearms but also ensures optimal performance and safety. The ease of use and durable construction of the tools make the cleaning process efficient and effective. Investing in the Shooter's Choice Universal Cleaning Kit is investing in the lasting quality and safe operation of your valuable firearms. I wholeheartedly recommend this kit to all gun owners who prioritize the proper care of their equipment.

-SP

#### Included in the Kit:
